

*28th International Conference  
on Particle Physics & Cosmology*

## PUBLIC LECTURE

**Rocky Kolb**  
*University of Chicago*

### The Quantum and the Cosmos

*Today, quantum laws rule in the microscopic world. But in the Big Bang era the entire Universe was subatomic and governed by quantum phenomena. The action of the quantum generated the seeds that grew to become all the cosmic structures around us today. The talk will discuss aspects of this connection between the quantum and the cosmos.*

**OCTOBER 14, 2025**  
**MCCONOMY AUDITORIUM | 6 PM**
